Responsible Innovation

# Benefits

## Quality of life

Your joint replacement surgery is all about improving your quality of life. Corin RPM notifies you with regular standardized questionnaires to complete from the comfort of your smartphone, to provide quality of life scores pre/post surgery.

## Physical activity

Improving physical activity is the goal for undergoing joint replacement surgery. The black waterproof wristband provided with the Corin RPM program measures the number of steps you perform everyday, therefore assessing your physical activity level pre/post surgery.

## Sleep

Sleeping better can help improve your quality of life. The same wristband that measures your steps also measures the quantity of your sleep pre/post surgery.

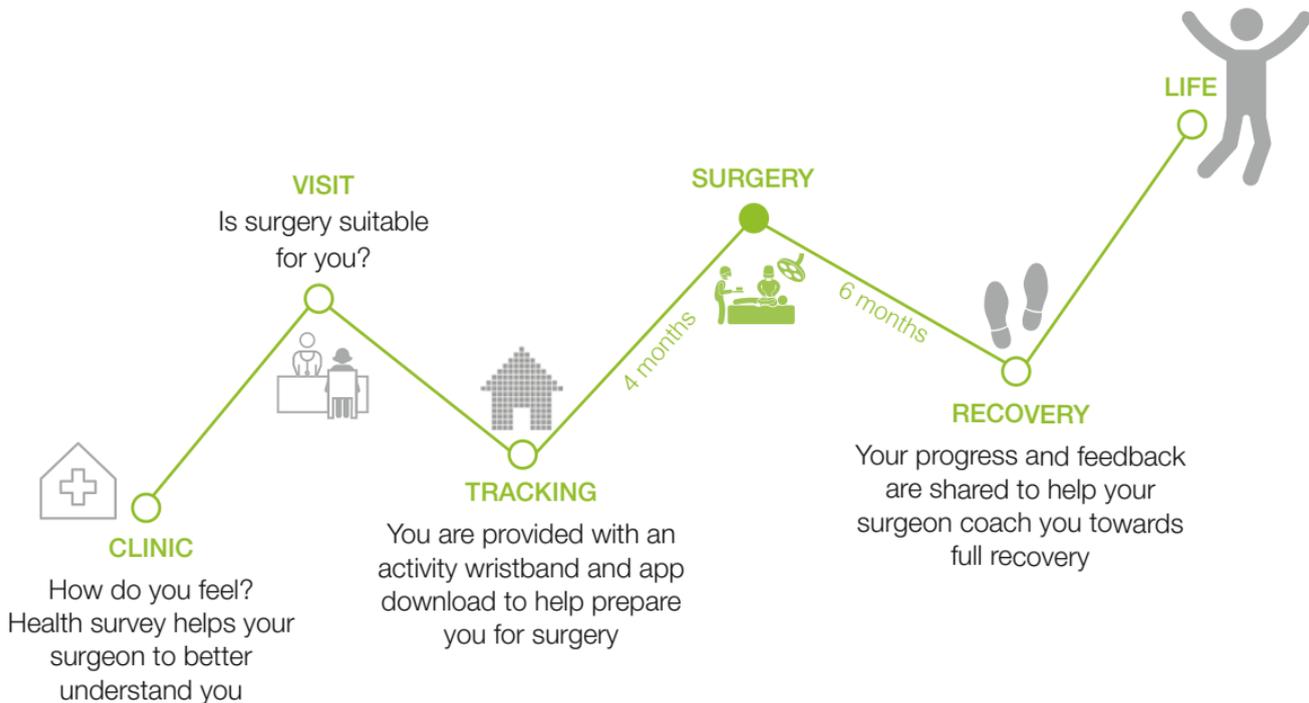

## Engaged

The Corin RPM patient app feeds your data and health survey responses directly back to your surgeon and clinical staff who can communicate with you via secured messaging, be updated with your health status and follow you through your care experience.

# Your care experience

# Our commitment

## Our experience at your service

Corin is a world leader in the design, development, production and distribution of a wide range of cutting edge, reconstructive orthopedic solutions and has pioneered a number of landmark orthopedic developments since it was founded in 1985.

## Ensuring innovation

We are committed to finding new and innovative solutions to positively impact the lives and improve patient outcomes around the globe.

## Our personalised approach

Surgical procedures present a unique set of challenges and experiences for every patient. To this account, it is only logical that healthcare should be customized for every patient. Corin RPM is the tailored solution that respects your individuality.

# The technology

## Your wristband

Waterproof and 1-year battery

Collects activity and sleep data that syncs wirelessly via Bluetooth to your smartphone.

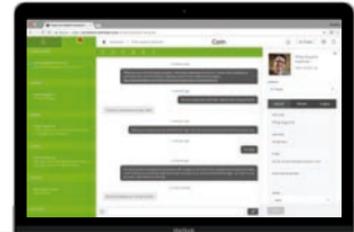

Wear it and forget about it!

## Corin RPM Patient App

Available on iOS and Android

Digital logbook for steps, sleep, weight, mood and health surveys. Share your status and check your progress!

## Clinical dashboard for surgeons

Your data is available for your surgeon and healthcare staff to keep an eye on you as you progress through your care experience.

# Frequently Asked Questions

## Why apply?

The objective of this app-based program is to help you prepare for joint replacement surgery, coach you through recovery and take care of you through your healing journey.

## Your data?

The data collected by the app from your wristband, your manual inputs, and your answers to questionnaires are stored, hosted and protected according to recognized security standards. Personal data identifying you is only accessible to authorized staff.

## How to participate?

To participate, you must first be invited by your orthopedic surgeon and then register for the program. Your surgeon's invitation will allow you to download and use the Corin RPM Patient app on your smartphone.
